

BUILDING UP B.V.

Fast and Effective Solutions for hard-to-reach places. When access is difficult, Building UP B.V. offers the solution!

Rope techniques: The Smart Choice

Traditional scaffolding can be expensive and time-consuming, requiring permits and (road) closures. Moreover, it is difficult to move large equipment through narrow streets. Neither scaffolding nor aerial work platforms can make all places accessible.

Rope Access rope techniques change all that. Our expert technicians use advanced climbing and rope techniques to get where they are needed quickly and efficiently. Whether high above the city or above open water, we reach problem areas with ease, saving time and effort every step of the way.

Speed is crucial when dealing with damage. If nothing is done about it, even minor problems can escalate, leading to much higher repair costs. That is why we focus on fast, precise repairs, no matter how difficult the location is to reach.

Case study

- **Reported Problem:** In November 2023, a dislodged rainwater drain, which was detached from the building façade, was observed.
- **Previous Attempts:** Despite the efforts of eight different teams, including scaffolding specialists and AWP teams, no permanent solution had been found by March 2024.
- **Building UP Steps In:** Inspection Date: 28-03-2024. Our expert conducted a thorough pre-inspection.
- **Repair date:** 29-03-2024 (08:00 am) A professional team arrived on site and started the repair process using advanced rope techniques. By 10:58 the same day, the repair was carried out and the rigging cleared.

Rope techniques for every construction challenge

At Building UP, our innovative rope techniques offer unparalleled versatility. Whether you need urgent repairs such as fixing leaks, replacing worn roof tiles, or addressing broken rainwater drains, we are here for you. From minor repairs to planned maintenance, we offer a cost-effective, efficient alternative to traditional scaffolding or aerial platforms.

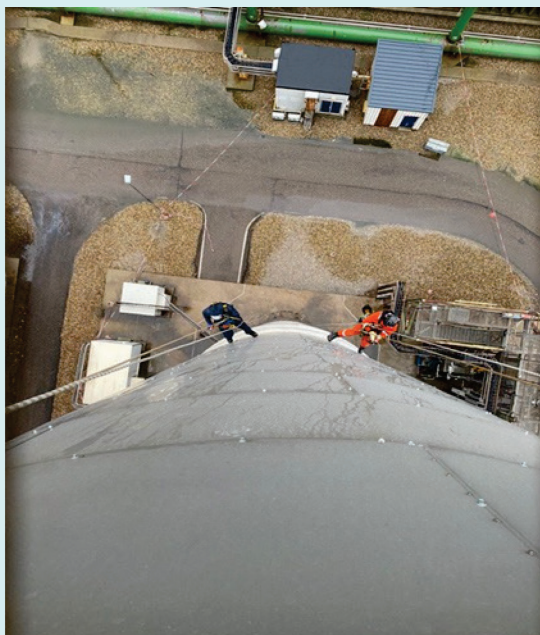

Our expert team carries out all tasks in-house, ensuring quality and precision every time. For those tricky, hard-to-reach areas that require specialised attention, we partner with professionals to bring in the best expertise when needed. Should there be a request for help

where we do not have the right expertise, we are always able to get the relevant tradesman to the desired, difficult-to-reach spot using Rope Access rope techniques.

This means that Building Up offers you a total solution.
